Mathematics

Degree conferred
Master of Science in Mathematics

Languages of study
Study in French, German and English

Commencement of studies
Commencement of studies in the Autumn Semester (September) or in the Spring Semester (February)

Access to further studies
Ph.D.

Fribourg profile
In accordance with the multi-lingual and international profile of the University, mathematics classes at Fribourg are taught in French, German and English, while seminars are trilingual. Students may choose the language of their seminar talks, written works and exams between French, German and English. The Mathematics Department is well integrated into the international research landscape, and provides a particularly attractive learning environment. Assistants and professors are easily accessible and ready to provide advice and help. Master's level classes at the nearby universities of Bern and Neuchâtel are open to students registered at Fribourg and can be part of their curriculum. Activities from the "Swiss Doctoral Programme in Mathematics" can equally be integrated into the course of study.

Profile of the study programme
The study programme provides a high-level education in pure and applied mathematics and involves individualized curricula specializing in several domains of analysis, algebra and geometry, topology, statistics, numerical analysis or biomathematics. Previous course work can be extended in computer science, physics or economics. Master's level classes at the nearby universities of Bern and Neuchâtel are open to students registered at Fribourg and can be part of their curriculum. Activities from the «Swiss Doctoral Program in Mathematics» can equally be integrated into the course of study. The programme culminates in a Master's thesis under the supervision of a thesis advisor with a final presentation of the results.

Profile of the study programme
This Master offers advanced classes in a broad spectrum of mathematical areas. Students follow highly individualized curricula specializing in several domains of analysis, algebra and geometry, topology, statistics, numerical analysis or biomathematics. It is also possible to extend previous course work in computer science, physics or economics at the Master's level. Lectures and seminars introduce students to the world of mathematical research. The study programme culminates in a Master's thesis carried out under the supervision of a thesis advisor, and a final presentation of the results.

Studies organisation
Structure of studies
90 ECTS credits, 3 semesters
Curriculum
http://studies.unifr.ch/go/xZPll (French)
http://studies.unifr.ch/go/z3FE1 (German)
Admission
Master's degree programmes are built on the knowledge and abilities that were acquired when obtaining a Bachelor's degree. Holders of a Bachelor's degree awarded from a Swiss university can be admitted to a Master's degree programme within the corresponding discipline (requires the acquisition of minimum 60 ECTS credits at Bachelor level in the corresponding discipline) without any additional requirements. The same applies to holders of a Bachelor's degree awarded by a foreign university, provided that the Bachelor's degree is recognised and considered equivalent by the University of Fribourg.

Alternatives
Also offered as a minor study programme (30 ECTS credits).
