Profile of the study programme

«Understanding their faith» is not the sole motivation of the students who enrol for our fields of study. While the phenomenon of religion has lost some significance in public perception, in the pluralist and multicultural society of today it is meeting with renewed interest. The course focuses on developing a critical way of thinking, the ability to shape the public debate on issues of values and truth, and a personal search as to how to «imagine» God in our own lives.

Besides studying theology as a complete course of study, the Faculty of Theology also provides the possibility of studying theology as part of a Bachelor of Arts course and combining it with any other minor study programme of a student’s choice. Students can thus tailor their theology studies by combining them with other fields.

Career openings

The study of theology opens up career prospects in public social and cultural facilities, mediation, the publishing industry, human resources, social work and psychological counselling, counselling centres for religion and worldview issues (interreligious dialogue) and ethics counselling, as well as in adult education and journalism.
