Teacher Education for Secondary Level I

Degree conferred
Bachelor of Arts/Bachelor of Science in Secondary Education Level I

Languages of study
Possibility to study in French or in German

Commencement of studies
Students taking the Bachelor of Science in Secondary Education Level I may only start their studies in the autumn semester (September).

Access to further studies
This Bachelor programme qualifies students for the Master of Arts en enseignement pour le degré secondaire I/Master of Arts für den Unterricht auf der Sekundarstufe I.

The «Master of Arts en enseignement pour le degré secondaire I/Master of Arts für den Unterricht auf der Sekundarstufe I» is conferred after completion of the complete course of study (Bachelor + Master). This degree also qualifies students for the «Diplôme d'enseignement pour le degré secondaire I (DAES I)/Lehrdiplom für die Sekundarstufe I (LDS I)». The DAES I/LDS I is a state diploma recognised by the Swiss Conference of Cantonal Ministers of Education (CDIP/EDK). This sole diploma gives graduates authority to teach at secondary school level I.

This training course is aimed at people wishing to teach in Cycle d'Orienteringsschulen (CO) classes. During the Bachelor's degree, students learn the scientific knowledge and the content specific to their teaching subjects in the respective university faculties; the French-speaking Centre d'enseignement et de recherche pour la formation à l'enseignement au secondaire (CERF) and the German-speaking Zentrum für Lehrerinnen- und Lehrerbildung der Universität Freiburg (ZELF) teacher training facilities then complement the subject knowledge acquired by the future teachers by providing the professional training, educational skills, didactics and teaching practice.

Profile of the study programme
The University of Fribourg offers a course in Teacher Education for Secondary Level I, either in German (LDS I), or in French (DAES I), or bilingually. This training course consists of a Bachelor of Arts in Secondary Education Level I comprising 180 ECTS credits (BA_SI in the faculties of Theology or Humanities) or a Bachelor of Science in Secondary Education Level I comprising 180 ECTS credits (BSc_SI in the Faculty of Science and Medicine) followed by a «Master of Arts en enseignement pour le degré secondaire I/Master of Arts für den Unterricht auf der Sekundarstufe I».

Objective
This training course is aimed at people wishing to teach in Cycle d'Orienteringsschulen (CO) classes, corresponding to the final three years of compulsory education, in Switzerland. This prepares students to teach three to four subjects featured in the curriculum of these schools.

The Bachelor's degree does not qualify students to teach; a «Master of Arts en enseignement pour le degré secondaire I/Master of Arts für den Unterricht auf der Sekundarstufe I» is required to teach in secondary level I education in Switzerland.

Subject training
The Bachelor course is aimed at providing candidates with basic scientific knowledge of their chosen teaching subjects (subject training), as well as the professional skills required to teach pupils in the three final years of compulsory education (professional training, educational skills, didactics and teaching practice). As a general rule, the subject training is done in the different faculties (which means that students follow the study programmes of their chosen teaching subjects), while the professional training, educational skills, didactics and teaching practice are taught in the teacher training facilities [the French-speaking Centre d'enseignement et de recherche pour la formation à l'enseignement au secondaire (CERF) and the German-speaking Zentrum für Lehrerinnen- und Lehrerbildung der Universität Freiburg (ZELF)].

Professional training, educational skills, didactics and teaching practice at the Bachelor level
The main emphasis is on introducing students to areas of scientific knowledge which play a role in teaching (educational sciences, humanities, didactics) through coursework, and to the practical aspects of teacher training through teaching practice in CO classes. The different periods of teaching practice which are a part of the training course ensure students take their first steps as teachers under the supervision of a tutor, the latter being a partner of the CERF or LDSI for the practical part of the course.

Languages in which the course is taught
Students may take the course according to a French or German-language study plan, or else according to a bilingual study plan (with either German or French as the major language).

The general admission requirements to the Bachelor programmes at the University of Fribourg for holders of foreign school-leaving certificates as well as the admission requirements for individual countries are to be found on the webpages of swissuniversities: http://studies.unifr.ch/go/en-admission-countrylist

In addition, foreign candidates must present proof of sufficient language skills in French or German.

The assessment of foreign school-leaving certificates is based on the «CRUS Recommendations for the Assessment of Foreign Upper Secondary School-Leaving Certificates, 7 September 2007» (http://studies.unifr.ch/go/crus07en). The admission requirements are valid for the respective academic year. The Rectorat of the University of Fribourg reserves the right to change these requirements at any time.
