Fribourg profile
Since 2019, the Medicine Section of the Faculty of Science and Medicine of the University of Fribourg offers a doctoral programme leading to the academic degree of Doctor of Medicine (Dr. med./MD).

Research areas
PhD students generally form part of a research group in the Medicine Section. The Medicine Section is made up of five departments at several locations (mainly the university's Pérolles site and Fribourg Hospital) with a broad range of different research activities. These are:

- Endocrinology, Metabolic Science and Cardiovascular System
- Neurosciences and Movement Science
- Oncology, Microbiology and Immunology
- Medicine and Public Health
- Medical-Surgical Specialties

The Institute for Family Medicine and the National Reference Centre for the Early Detection and Monitoring of Antibiotic Resistance (NARA) are also affiliated to the Medical Section.

With the agreement of the Faculty, research work may be carried out at other universities, research centres or university hospitals, as well as at industrial companies, provided the appropriate research infrastructure, competent people available to supervise the research project and an academic environment (access to academic colloquia, seminars and conferences, other researchers in related fields, etc.) are available on site.

List of research groups: See Contact

Studies organisation

Structure of studies
No ECTS credits can be earned.

Doctoral school

Admission
Candidates must have a Master's degree in Human Medicine and a Swiss Federal Diploma in Human Medicine, or an equivalent qualification.
