Fribourg profile
The Faculty of Theology in Fribourg is the largest faculty theology in Switzerland and one of two Catholic theology faculties integrated into a state university. It is subject to national law, like the other University faculties, but in addition is acknowledged by the Church and is supported by the Dominican Order and the Swiss Bishops Conference.

Theology differs from other scientific fields insofar as it has its own unique outlook: it deals primarily with God and humans, to the extent they refer to God as their origin and purpose. It reflects its own position as well as that of every Church in the community. Theologians share the responsibility for the planet’s sustainable development with a human face. In light of the deregulation of religion and ethics (fundamentalist and esoteric movements) and the search for a peaceful world where different religions and cultures can coexist, theology plays a critical role in engaging a discourse on the question of truth and values.

From this perspective, the Faculty of Theology serves the Church as a community, as well as its individual members, and also serves society as a whole. The issues explored through the study of theology using a variety of scientific research methods play a critically constructive role.
