If you are interested in teaching psychology and education in academic upper secondary schools, this master's degree programme will enable you to present an overall view of both these disciplines and their specific features. In doing so, you will be helping the pupils to choose a line of study, and also to gain a better understanding of how the individual functions as a child, as a teenager, and as an adult, and the risks associated with these periods of life.

The course, which is divided equally between classes and seminars on psychology and teaching in educational sciences, will allow you to broaden the knowledge you acquired during your bachelor’s degree. You can choose this programme either as a minor or major. Moreover, you can take the course in French, in German or bilingually, which will considerably strengthen your employability.

If you have only studied one of these disciplines at the bachelor level, you will need to do a pre-master’s course to catch up the required level in the other subject.

Profile of the study programme

The master’s degree programme is aimed at students who have completed the bachelor’s course of the same name and are considering continuing their studies to obtain a Teaching Diploma for Academic Upper Secondary Education (Diplôme d’enseignement pour les écoles de maturité, DEEM/LDM). Holders of a bachelor’s degree in just one of these two disciplines must first of all take a pre-master’s course to catch up the required level in the second discipline.

Like the Bachelor’s programme in Education/Psychology, this programme is divided equally between classes and seminars in psychology and teaching in educational sciences. It can be taken either as a major (branche enseignable/Unterrichtsfach I) or minor (branche enseignable/Unterrichtsfach II) subject for the DEEM/LDM diploma. Students taking this as the major field of study for their master’s degree, that is as «branche/Fach I» of their teaching diploma, write a master’s thesis encompassing both disciplines, focusing on school and the behaviour or functioning of its key players – pupils, teachers, heads and parents.

Fribourg profile

Designed first and foremost as a cultural course of study, this programme enriches students’ knowledge of the two disciplines which go to make it up and applies it to all the fields and approaches covered by them. Strictly speaking, it therefore broadens rather than deepens the knowledge obtained during the bachelor’s degree.

This programme can be taken entirely in French or in German, or bilingually; this greatly increases students’ employability as they will be capable of teaching these disciplines to French or German-speaking academic upper secondary school pupils.

Learning outcomes and career openings

On completing this programme, students will be capable of presenting an overall view of both these disciplines and their specific features to academic upper secondary school pupils to help them choose their subsequent line of study, as well as giving them a greater understanding of how the individual functions as a child, as a teenager and as an adult, and the risks associated with these different periods of life; they will also gain greater insights into the personal and social issues involved in education.

Note that there are restrictions on the professions of psychologist or psychotherapist and this programme does not give access to them.

Organisation des études

Structure of studies

90 ECTS credits + 30 ECTS credits as an option in a minor study programme freely chosen, 3-4 semesters

Curriculum

http://studies.unifr.ch/go/zmTkP (German)

Admission

Master’s degree programmes are built on the knowledge and abilities that were acquired when obtaining a Bachelor’s degree.

Holders of a Bachelor’s degree awarded from a Swiss university can be admitted to a Master’s degree programme within the corresponding discipline (requires the acquisition of minimum 60 ECTS credits at Bachelor level in the corresponding discipline) without any additional requirements. The same applies to holders of a Bachelor’s degree awarded by a foreign university, provided that the Bachelor’s degree is recognised and considered equivalent by the University of Fribourg.
Holders of a Bachelor’s degree awarded from a Swiss university or holders of a Bachelor’s degree awarded by a foreign university, provided that the Bachelor’s degree is recognised and considered equivalent by the University of Fribourg, can be admitted to a Master’s degree programme within another discipline with prerequisites (must be successfully completed before starting the Master’s degree programme) or additional requirements (can be completed during the Master’s degree programme). According to existing agreements, holders of a Bachelor’s degree awarded from a Swiss university of applied sciences can also be admitted with prerequisites or additional requirements.

The respective conditions of admission for each Master's degree programme are reserved.

Alternatives

Also offered as a minor study programme (30 ECTS credits).
