Psychology

Degree conferred
Bachelor of Science

Options
For information on the optional award of the distinction «Bilingual curriculum» (French – German), please contact the relevant Department (see Contact).

Languages of study
Possibility to study in French, in German or in French and German.

Commencement of studies
Commencement of studies only in the Autumn Semester (September)

Access to further studies
Master

Students who are interested in the human experience and behaviour are on the right track with a course of study in psychology. Here, we study how feelings, experiences, education and motivational factors affect us and what role the cultural and social environment plays. At Bachelor level, particular emphasis is placed on always letting the students confront their theories of everyday life with the insights of scientific psychology.

During the three-year study programme, they become acquainted with the fundamental professional knowledge, the working methods used in research, the various areas of application of psychology and the basic competencies of psychological diagnostics and counselling. Two months of internship and a written thesis crown the bachelor studies.

In addition, the bilingualism of the course of studies is a unique feature of the studies in psychology at the University of Fribourg: Here, graduate school programmes are offered in German and French as well as bilingually.

Contents and basic structure of studies
During the first academic year, the main focus lies on gaining an overview of the subject, initial contact with academic working methods and an introduction into the various fields of psychology. Methodological knowledge and research competencies are systematically established.

The second academic year is devoted to expanding methodological and basic knowledge and introducing students to areas of application of psychology and to basic practical, psychological competencies in the fields of psychological diagnostics and psychological counselling.

In the third year knowledge of basic subjects and applications is deepened, and students absolve a two-month internship and write a Bachelor thesis.

Career prospects and further education
The Bachelor's programme in psychology prepares students for the following areas of employment: diagnostics, counselling, psychological intervention, such as prevention or psychotherapy, and scientific research in these fields.

The main areas of activity are health care, the educational system and the working environment.

Within most professions, professional work as a psychologist requires a Master's degree in addition to a Bachelor's degree and sometimes an additional practical qualification. The most important psychological occupational fields are clinical psychology, industrial psychology, organisational psychology, market research and advertising, educational psychology, environmental psychology, traffic psychology and media psychology.

After the Master's degree, doctoral studies are provided as the main offer of further education for even better research qualifications, for example, for professional activities at the university.

Profile of the study programme
The study of psychology introduces the students to the science of psychology, which deals with human experience and behaviour. They thereby study the motivational, emotional, cognitive and psychomotor processes which occur within a cultural and social context and are more or less directly rooted in human biological makeup.

Psychological practice is based on the constituent parts of this scientific knowledge and on psychologists' theories of everyday life. During the studies, great importance is attached to ensuring that individual student compare their theories of everyday life with those of scientific psychology.

This course of study leads to a Bachelor of Science degree and imparts, among other things, fundamental knowledge of psychological activities in the areas of diagnostics and counselling.

The bilingualism of the course of studies is a unique feature of the studies in psychology at the University of Fribourg. The Department of Psychology offers courses of study in German and French as well as bilingually.

Studies organisation

Structure of studies
180 ECTS credits, 6 semesters

Curriculum
http://studies.unifr.ch/go/44B_S (French)
http://studies.unifr.ch/go/lvBrp (German)
Admission

The following **Swiss school-leaving certificates** grant admission to Bachelor programmes at the University of Fribourg:

- Swiss academic Maturity Certificate
- Swiss professional Maturity Certificate in conjunction with the supplementary exam certificate from the Swiss Maturity Commission
- Bachelor Degree from a Swiss university, from an accredited Swiss university of applied sciences (HES/FH) or from a Swiss university of teacher education (HEP/PH)

A complete list of all further recognized Swiss school-leaving certificates is to be found on the webpages of swissuniversities (in French and German only): [http://studies.unifr.ch/go/en-admission-swiss-certificates](http://studies.unifr.ch/go/en-admission-swiss-certificates)

**Foreign upper secondary school-leaving certificates** are recognised only if they correspond substantially to the Swiss Maturity Certificate. They must qualify as general education. Foreign school-leaving certificates are considered to be general education if the last three years of schooling include at least six general education subjects, independent from each other, in accordance with the following list:

1. First language (native language)
2. Second language
3. Mathematics
4. Natural sciences (biology, chemistry or physics)
5. Humanities and social sciences (geography, history or economics/law)
6. Elective (an additional language or an additional subject from category 4 or 5)

The general admission requirements to the Bachelor programmes at the University of Fribourg for holders of foreign school-leaving certificates as well as the admission requirements for individual countries are to be found on the webpages of swissuniversities: [http://studies.unifr.ch/go/en-admission-countries](http://studies.unifr.ch/go/en-admission-countries)

In addition, foreign candidates must present proof of sufficient language skills in French or German.

The assessment of foreign school-leaving certificates is based on the «CRUS Recommendations for the Assessment of Foreign Upper Secondary School-Leaving Certificates, 7 September 2007» ([http://studies.unifr.ch/go/crus07en](http://studies.unifr.ch/go/crus07en)). The admission requirements are valid for the respective academic year. The Rectorat of the University of Fribourg reserves the right to change these requirements at any time.

Alternatives

Also offered as a minor study programme (60/30 ECTS credits).
