French as a Foreign Language

Degree conferred

Languages of study
Study in French

Commencement of studies
Commencement of studies in the Autumn Semester (September) or in the Spring Semester (February)

Access to further studies
As a general rule, this Bachelor programme qualifies students for the Master programme: French as a Foreign Language/French as a Second Language.

The Bachelor's programme French as a foreign language/French as a second language (FLE/FLS) provides theoretical and practical training for teaching FLE/FLS to a range of target groups, including children and adults. The course is delivered through lessons and seminars to consolidate various aspects of students' knowledge of French – linguistics, language acquisition, didactics, culture and interculturality – in relation to teaching and learning. The Fribourg University's FLE/FLS Bachelor's programme is based on a multilingual approach in more than one way: the multilingual environment that is a feature of the city of Fribourg, the placing of FLE/FLS studies in the «Multilingualism and Foreign Language Education Domain», and the links with the research conducted at the Institute of Multilingualism.

Profile of the study programme

The French as a foreign language/French as a second language (FLE/FLS) Bachelor's programme is broken down into four subject areas, as follows below.

The language practice subject area is an opportunity for students to expand and consolidate their foreign or second language learning experience. Non-Francophone students will develop their written and oral French skills with a view to reaching level C1 of the Common European Framework of Reference for Languages. A three-month language course will also enable them to fine-tune their skills by being fully immersed in a French-speaking environment. French-speaking students will start to learn a new foreign language and will develop their knowledge of another language through tandem learning. These two experiences aim to foster discussions on the learning process, and to develop practices based on interaction and communication strategies.

The applied linguistics subject area introduces theoretical notions for the description of French language. These notions are then applied in seminars aimed at teaching practice, with a particular focus on teaching grammar and vocabulary, and the use of media in language classes.

The FLE/FLS didactics section includes a theoretical introduction to foreign and second language acquisition. This theoretical approach will then be completed with a range of seminars that focus on the development of practical knowledge and FLE/FLS teaching skills, such as assessment tools, oral and written didactics, literature, information and communication technologies for teaching, and the teaching of French aimed at migrants (French as a school language and French for Specific Purposes).

Lastly, in the Intercultural subject area, students will acquire basic knowledge of intercultural communication theories and their application for classroom interaction. This section also includes modules on the cultural, literary and artistic history of French-speaking regions.

Fribourg profile

The Fribourg University's FLE/FLS training fosters the development of theoretical knowledge, practical skills, critical assessment and personal considerations of learning French from the teacher’s and the learner’s point of view. The enhanced knowledge of linguistic, didactic, cultural and intercultural aspects and of second and foreign language learning theories provides a solid grounding for professions related to French language and francophone culture.

FLE/FLS studies are not only a means to learn and teach French. They also consider French as a language for integration and school education. This course is particularly relevant in these times of increased mobility and migration.

As it is part of the Multilingualism and Foreign Language Education Domain the Fribourg University's FLE/FLS course is fully open to multilingualism in terms of its practical applications and research fields, in particular through its close ties with the research conducted at the Institute of Multilingualism.

Learning outcomes and career openings

Graduates will have the technical skills needed to teach French as a foreign or second language, in Switzerland and abroad.

They have knowledge of the theories, notions and approaches of linguistics, the teaching of foreign languages and intercultural studies, which are the foundations of modern foreign language learning. Being aware of the trends in these disciplines, graduates are able to consider and discuss emerging theories. They can analyse and assess FLE/FLS teaching notions and methods, and are able to observe, prepare and assess language learning processes.

Career opportunities include, among others, teaching French in different contexts, at school or as part of support for migrants, language learning for adults, exchange programmes, the promotion of languages in corporate or professional environments, the bilingual teaching of language and subjects, or creative activities in...
the field of foreign languages.

Admission

The following Swiss school-leaving certificates grant admission to Bachelor programmes at the University of Fribourg:

- Swiss academic Maturity Certificate
- Swiss professional Maturity Certificate in conjunction with the supplementary exam certificate from the Swiss Maturity Commission
- Bachelor Degree from a Swiss university, from an accredited Swiss university of applied sciences (HES/FH) or from a Swiss university of teacher education (HEP/PH)

A complete list of all further recognized Swiss school-leaving certificates is to be found on the webpages of swissuniversities (in French and German only): http://studies.unifr.ch/go/en-admission-swiss-certificates

Foreign upper secondary school-leaving certificates are recognised only if they correspond substantially to the Swiss Maturity Certificate. They must qualify as general education. Foreign school-leaving certificates are considered to be general education if the last three years of schooling include at least six general education subjects, independent from each other, in accordance with the following list:

1. First language (native language)
2. Second language
3. Mathematics
4. Natural sciences (biology, chemistry or physics)
5. Humanities and social sciences (geography, history or economics/law)
6. Elective (an additional language or an additional subject from category 4 or 5)

The general admission requirements to the Bachelor programmes at the University of Fribourg for holders of foreign school-leaving certificates as well as the admission requirements for individual countries are to be found on the webpages of swissuniversities: http://studies.unifr.ch/go/en-admission-countries

In addition, foreign candidates must present proof of sufficient language skills in French or German.

The assessment of foreign school-leaving certificates is based on the «CRUS Recommendations for the Assessment of Foreign Upper Secondary School-Leaving Certificates, 7 September 2007» (http://studies.unifr.ch/go/crus07en). The admission requirements are valid for the respective academic year. The Rectorat of the University of Fribourg reserves the right to change these requirements at any time.
