Physics

Degree conferred
Master of Science in Physics

Languages of study
Study in English

Commencement of studies
Commencement of studies in the Autumn Semester (September) or in the Spring Semester (February)

Access to further studies
This Master programme qualifies students also for the Doctoral programme Medical Sciences

At Master's level, this study programme in Physics provides students with advanced courses and starts the process of specialisation. About half of the courses are compulsory and of general interest, the other half consists of more specialised elective courses.

The Master’s thesis will be supervised by an active researcher and initiates students to the frontiers of research. At the Master's level, about half of the courses are compulsory and of general interest, the other half consists of more specialized elective courses. Specialised lectures may also be taken at other universities, in particular Bern. It is recommended that you follow the specialised lectures in the field of your future Master’s thesis. Other lectures, at your discretion, are necessary to complete the requirements. The lectures are complemented by seminars on modern research topics and advanced laboratory work, colloquia and project in research group.

Compulsory courses:
- Theoretical physics: Advanced statistical mechanics,
Learning scientific rigor, abstract thinking, experimental and mathematical skills, the ability to describe concrete phenomena by theoretical models, the ability to identify relevant variables, are skills of good standing in the search for employment in both the public and private sectors. Branches where physicists are welcome include machine and electronic industries, applied computing, insurance companies, risk management and even financial mathematics. Besides those typical careers, physicists frequently appear in important managerial positions or in politics.

Studies organisation

Structure of studies

90 ECTS credits, 3 semesters

Curriculum

http://studies.unifr.ch/go/xZPll (French)
http://studies.unifr.ch/go/z3FE1 (German)

Admission

Master's degree programmes are built on the knowledge and abilities that were acquired when obtaining a Bachelor's degree.

Holders of a Bachelor's degree awarded from a Swiss university can be admitted to a Master's degree programme within the corresponding discipline (requires the acquisition of minimum 60 ECTS credits at Bachelor level in the corresponding discipline) without any additional requirements. The same applies to holders of a Bachelor's degree awarded by a foreign university, provided that the Bachelor's degree is recognised and considered equivalent by the University of Fribourg.

Holders of a Bachelor's degree awarded from a Swiss university or holders of a Bachelor's degree awarded by a foreign university, provided that the Bachelor's degree is recognised and considered equivalent by the University of Fribourg, can be admitted to a Master's degree programme within another discipline with prerequisites (must be successfully completed before starting the Master's degree programme) or additional requirements (can be completed during the Master's degree programme). According to existing agreements, holders of a Bachelor's degree awarded from a Swiss university of applied sciences can also be admitted with prerequisites or additional requirements.

The respective conditions of admission for each Master's degree programme are reserved.

Alternatives

Also offered as a minor study programme (30 ECTS credits).
