

Course offerings 24/25 | AS24

Study programme description Doctorat

Mathematics

Degree conferred

Scientiarum doctor in mathematica / Doctor of Philosophy in Mathematics (PhD)

Commencement of studies

An application for admission may be submitted at any time.

Regulation http://studies.unifr.ch/go/Pm-6g (French and German only)

Application procedure Candidates with Swiss qualifications https://studies.unifr.ch/go/Ui3b4 Candidates with foreign qualifications https://studies.unifr.ch/go/2KPbe

Fribourg profile

The Department of Mathematics offers a PhD programme in Mathematics. This programme comprises a personal research project leading to a doctoral thesis to be completed over 3-4 years. PhD candidates participate in the scientific life at the Department through seminars, advanced courses, workshops or other activities at the Department or in the framework of the *Swiss Doctoral Program in Mathematics*.

The following is a list of professors supervising doctoral theses and of their areas of specialisation.

• Prof. Enrico Le Donne

 Metric and differential geometry, geometric measure theory, geometric analysis; in particular: Lipschitz analysis on metric spaces, sub-Riemannian geometry, group actions, rectifiability on Carnot groups, geometric group theory, asymptotic geometry, embedding problems

Prof. Anand Dessai

- Algebraic and differential topology, Riemannian geometry; group actions, positive curvature and symmetry, equivariant index theory

Prof. Ruth Kellerhals

 Hyperbolic geometry; geometry of discrete groups, geometric group theory, discrete and convex geometry, volumes and polylogarithms

• Prof. Ioan Manolescu

- Probability; problems inspired by statistical mechanics, lattice models such as percolation, random-cluster and Potts models, self-

avoiding walk

• Prof. Christian Mazza

 Applied probability; stochastic models in ecology and systems biology, biological networks, complex ecosystems, mathematical models of plant growth

• Prof. Stefan Wenger

 Geometric measure theory, metric geometry; currents in metric spaces, Lipschitz analysis, isoperimetric inequalities, minimal surfaces, asymptotic geometry

Studies organisation

Structure of studies

No ECTS credits can be earned.

Doctoral school

Admission

In order to be admitted to a doctorate the candidate must have been awarded an academic **bachelor's and master's degree** or an equivalent qualification from a university recognised by the University of Fribourg.

Before applying for a doctorate the candidate must contact **a professor** who would be willing to supervise the thesis work.

There is **no general right** to be admitted to a doctorate.

The respective conditions of admission for each doctoral study programme are reserved.
