Fribourg profile
The doctoral programme in Psychology is an integrated approach consisting of research, academic training and interventions. It provides doctoral students with an in-depth understanding of the theoretical foundations of the chosen sub-discipline and the research methods used in this sub-discipline. Doctoral students will learn to generate innovative knowledge based on strict methodologies and work with academic research teams or local companies. The research projects take place in the University of Fribourg laboratories. Currently 30 students are trained in these laboratories and have the opportunity to take part in research seminars at the University. They are also encouraged to present their research at national and international psychology conferences. This facilitates interactions between students and experienced researchers and allows students to develop a network for collaborations and for their future employment. For the same reason, they are encouraged/have the possibility to take part in one of the transuniversity doctoral schools affiliated to the department, such as the Programme doctoral romand en Psychologie, organised by the CUSO, the Lemanic Neuroscience Doctoral School (LNDs) or BeNeFRi exchanges.

Professors who are eligible to supervise theses
- Prof. Roberto Caldara
  Areas of specialisation:
  - Visual and social neuroscience
- Prof. Valérie Camos
- PD Dr Pascal Gygax
  Areas of specialisation:
  - Language and cognitive processes
  - Social Cognition
- Prof. Petra Klumb
  Areas of specialisation:
  - Personnel and organisational psychology
  - Psychology of health and social relations in the workplace
- Prof. Salome Kurth
  Areas of specialisation:
  - Development of sleep regulation
  - Maturation of neuronal networks
  - Mapping with high-density electroencephalography
  - Cognitive development in early childhood
  - Interaction with family context, nutrition, and gut microbiome
- Prof. Chantal Martin-Sölch
- Prof. Simone Munsch
  Areas of specialisation:
  - Clinical psychology and Psychotherapy, experimental psychopathology, psychophysiology, eating disorders
- Prof. Björn Rasch
  Areas of specialisation:
  - Cognitive neuroscience
  - Sleep, memory & health
- Prof. Jürgen Sauer
  Areas of specialisation:
  - Cognitive ergonomics and work psychology
  - Interactive consumer products, automation and complex work environments
- Prof. Dominik Schöbi
  Areas of specialisation:
  - Clinical psychology of the family, health psychology
  - Intimate relationships, interpersonal emotional dynamics, relational distress
- Prof. Petra Vetter
Areas of specialisation:
– Visual and Cognitive Neuroscience
– Visual and Multisensory Perception, Consciousness, Eye Movements, Neuroimaging

Studies organisation

Structure of studies

No ECTS credits can be earned.

Doctoral school

http://psychologie.cuso.ch

Admission

In order to be admitted to a doctorate the candidate must have been awarded an academic bachelor’s and master’s degree or an equivalent qualification from a university recognised by the University of Fribourg.

Before applying for a doctorate the candidate must contact a professor who would be willing to supervise the thesis work.

There is no general right to be admitted to a doctorate.

The respective conditions of admission for each doctoral study programme are reserved.
